Education Background

- B.Tech
Computer Science & Engineering
2020–2024
- Intermediate
Aditya Junior College
2018–2020
- SSC
Z P P High School
2017–2018

Key Skills

- Java
- C++
- Basics of SQL
- Basics of MongoDB
- HTML, CSS, JavaScript
- ReactJS
- Basics of NodeJS, ExpressJS
- Good at using VSCODE, FIGMA

Strengths

- Self Motivated
- Quick Learner
- Time Management

About Me

I am eager to start my career in software development. During my studies, I gained experience in programming languages such as Java and C++, and I have worked on several projects that involved web development and database management. My goal is to work for a company that values innovation and encourages professional growth.

Internships

Technical Hub

Full Stack Development – Intern

Jul'22 – Nov'22

Surampalem/On-Site

During my training period, I acquired significant knowledge in Full Stack Development. I learned how to create static web pages using HTML and CSS, and then how to improve their responsiveness using Bootstrap, a CSS framework. Later on, I gained expertise in implementing functionalities and creating component-based applications using React JS. To connect websites to web servers, I learned how to work with Node and Express JS. To store data, I also gained proficiency in working with MongoDB. Overall, these skills have made me a competent Full Stack Developer.

Projects

• Resource Management System

April 2023

The aim of the project is to develop a application which is used to maintain and manage the relationship between an administrator and users.

My role in this project is to connect and provide backend services to application. Technologies used to implement the project: **ReactJS, MongoDB, BootStrap, Figma, ExpressJS.**

Github: <https://github.com/20a91a0578/ResourceProject>

Cerifications

- Java Foundations **Oracle Academy**
- JavaScript IT Specialist **Jan'23**
- Java Basic **HackerRank**
- Python Basic **HackerRank**
- CSS Basic **HackerRank**
- HTML -5 **Infosys Spring Board**

• Attendance Management System

Sep 2023

The aim of the project is to develop a application which is used to manage the attendance for an organisation.

My role is in this project is to develop complete application which includes both Front-end and Back-end development. Technologies used to implement the project: **ReactJS, MongoDB, BootStrap, Figma, ExpressJS.**
